ASPEL

Polish companies at Medtec Japan 2025

Medical devices and equipment

Since 1986 ASPEL is a Polish manufacturer of advanced medical devices: electrocardiographs, ECG and ABPM holters, exercise test systems basing on treadmill or bicycle.

All ASPEL products meet the requirements of the MDR Directive (EU)2017/745, and have CE and CFS certifications. ASPEL is certified in accordance with EN ISO 13485. The tests of our medical equipment take place in an Accredited Measurement and Testing Laboratory.

Our treadmills and cycloergometers are distinguished by built-in ECG module - an innovative solution, which allows the patient to be connected directly to this equipment without having to purchase an external ECG unit.

Parallel to production, we distribute our medical devices in a B2B sales model.

Diet, nutrition and health supplements

Everel company deals with contract manufacturing of supplements under our Health Core brand and contract manufacturing of own brands for clients, which are pharmaceutical distributor networks and the fitness industry.

Our aim is to promote Diabetol (the product invented by Polish scientists) at trade fairs.

The unsaturated fatty acids omega-3 (alpha-linolenic) and omega-6 (linolenic acid), components of membrane phospholipids, contribute to maintaining normal blood cholesterol concentrations. Unsaturated fatty acids are involved in fat metabolism, nutrient transport in the body and the process of growth and development. They contribute to maintaining triglyceride levels, thereby supporting circulation and the vascular system.

We are developing two systems for automatic, individualised pulmonary rehabilitation in hospitals and homes.

Notos is a three-ball exerciser combined with a mobile app for gamified home use with the mobile app, while Boreas is an advanced mechatronic system enabling automatic resistance exercising in hospitals of multiple patients one after another.

Our devices solve the problem of insufficient pulmonary physiotherapists to provide enough treatment to patients after surgeries or with COPD, cancer, pneumonia or COVID by serving numerous patients simultaneously with fleets of devices. Now we start certifying both systems as medical devices and we seek for potential customers and investors.
