Energy Logserver – Scalable SIEM & IT Monitoring Platform. Energy Logserver is a modular log management and SIEM solution built on an open architecture for seamless integration with external tools. Known for high scalability, real-time performance, and flexible licensing, it offers a robust alternative to global SIEMs.

Key capabilities:

- Dashboards, threat & anomaly detection, and customized threat intelligence feeds
- Network probe for traffic analysis and data correlation
- Integrated with Energy SOAR for incident response and workflow automation
- Energy Monitor for complete IT visibility

Trusted by banks, telecoms, and public institutions, Energy Logserver minimizes incident impact and delivers a cohesive platform from monitoring to response.

webalize

Webalize – UX-Driven Digital Transformation

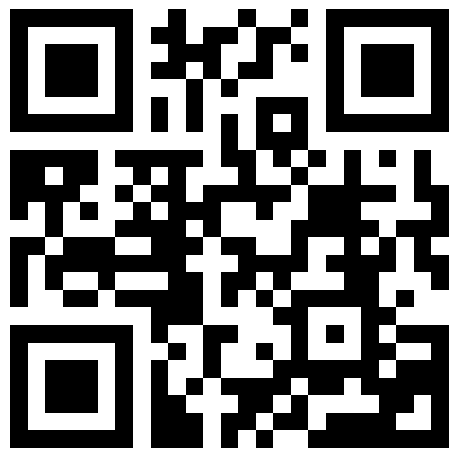

Webalize is a Polish software house delivering end-to-end custom web applications with a UX-first approach.

Our process: Discovery, validation, design, development, maintenance.

FinTech expertise:

- SMEO – redesigned factoring platform and website
- Financial scoring engine – personalized recommendations
- Wealthon – custom design system, refined UX/UI, 3D visuals

Why Webalize: Proven track record in financial innovation, blending design thinking with engineering precision for impactful digital experiences.

Marketing technology

Vintom is a Warsaw-based MarTech company that transforms customer data into highly personalised video experiences at scale. Its solution allows financial institutions to:

- Automatically produce millions of unique videos triggered by real-time events
- Greet each customer by name, summarise personal data, and suggest the next-best actions

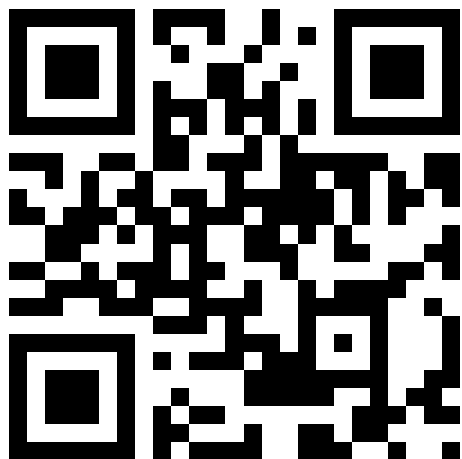

The technology stack combines:

- Cloud infrastructure
- Dynamic video rendering
- GDPR-compliant APIs for sensitive data protection
- AI-driven scene selection to optimise engagement

Key use cases include:

- Cross-sell and upsell offers
- Product activation
- Mobile service onboarding
- Statement explainers
- Loyalty programmes

With 10 years on the global market, Vintom is trusted by leading brands such as Visa, Citi, HSBC, and Standard Chartered.

FX and payments

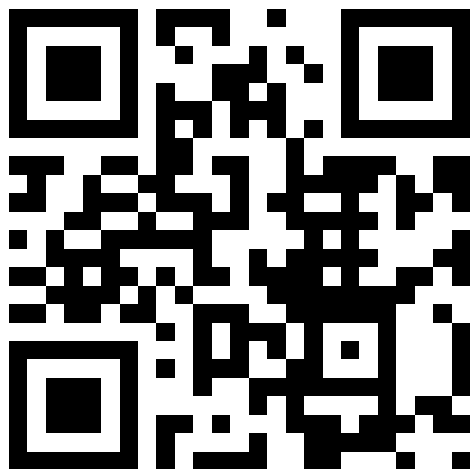

AFORTI.BIZ is a currency exchange platform for businesses, operating since 2012 and based in Warsaw.

We provide entrepreneurs with a comprehensive financial service, including:

- Attractive currency exchange rates
- Dedicated support from professional tutors
- Loyalty Program for regular clients
- Business financing through factoring solutions

Our platform is tailored to meet the needs of companies seeking efficient, secure, and cost-effective financial operations.

Electronic and mobile payments, Digital banking, Cryptocurrencies and blockchain, RegTech

Our startup offers an AI-powered ERP suite designed for small and medium-sized enterprises (SMEs). The system consists of three integrated modules:

- Payroll
- Invoicing
- Back Office Business Intelligence

We help automate administrative and financial operations using:

- Intelligent automation
- Generative AI

Key technologies:

- Hedera Hashgraph – ensures secure, immutable, and verifiable transaction records
- AI-driven process optimisation – boosts efficiency and reduces manual workload

Benefits:

- Increased transparency and trust in financial workflows
- Streamlined operations for payroll, billing, and reporting

Electronic and mobile payments,
Digital banking, Cryptocurrencies
and blockchain

StaBillon
Powered by  billon

Stabillon sp. z o.o. (formerly Billon Solutions sp. z o.o.) is a licensed e-money institution, authorised by the Polish Financial Supervision Authority (KNF) to issue e-money (License No. KIPE1/2019).

It is the only entity in Poland authorised to provide these services as an electronic money institution.

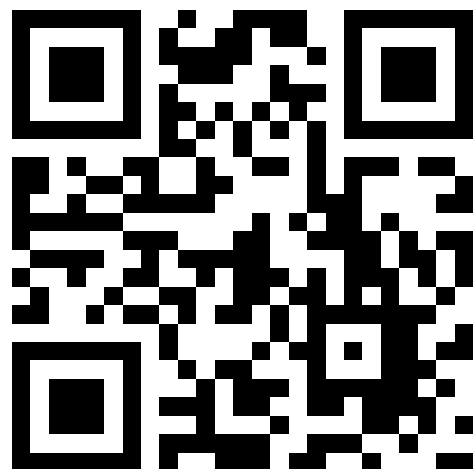

Key facts:

- Over 5 years of market experience
- Technological expertise and proven operational track record
- Numerous projects delivered across Europe and beyond

Our solutions:

- Successfully implemented in various industries
- Demonstrated scalability and reliability in diverse environments

As part of the Billon Group, Stabillon acts as a bridge between traditional finance and the DeFi economy, combining compliance with innovation.

Online loans and financing, Digital banking, Personal Finance Management (PFM), Cybersecurity

INCAT is a European technology provider offering the BOS core banking system - a cloud-native, modular platform designed for fintechs and digital banks.

Key features of BOS:

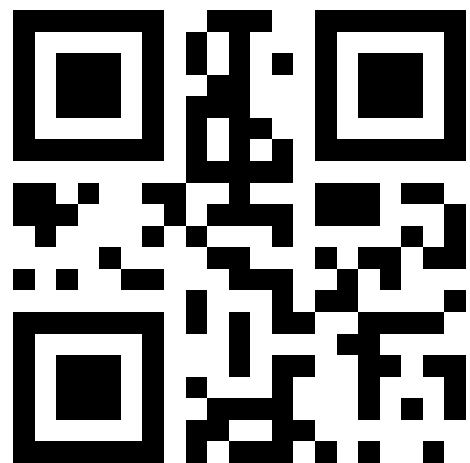

- Fast product launches
- Flexible pricing models
- Full Sharia compliance, ideal for Asian markets

Strategic focus:

- Expansion in Asia, building on growth in the GCC region
- Targeting small and mid-sized fintechs and neobanks

Why Singapore Fintech Festival matters:

- Perfect platform to showcase INCAT's offering
- Supports our global expansion strategy

Cybersecurity

CyCommSec Sp. z o.o. is a cybersecurity company specializing in offensive security services.

Our expertise includes:

- Penetration testing
- Vulnerability management
- Red teaming
- Security audits for cloud, AI/LLM, and OT/IoT environments

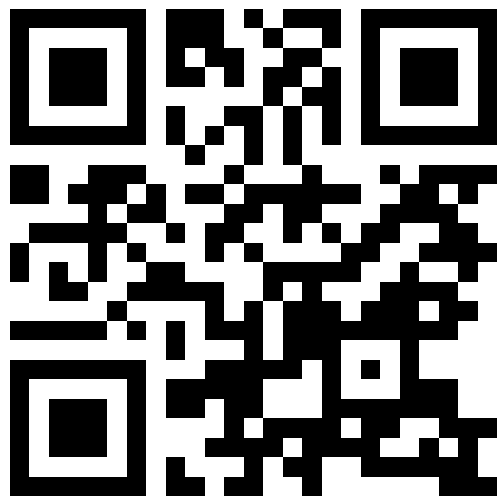

Flagship solution:

- FuseAI – an AI-powered pentesting automation engine that accelerates:
 - Risk discovery
 - Analysis
 - Mitigation

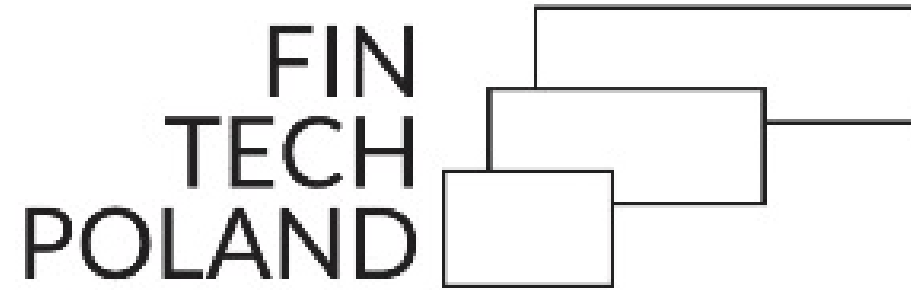

At the fair, we showcase:

- Pentest-as-a-Service (PTaaS)
- Vulnerability Management-as-a-Service
- Compliance consulting (NIS2, DORA, ISO, MDR)
- Continuous offensive security monitoring

Our mission: enhance cyber resilience through cutting-edge automation and expert support.

The biggest Polish
fintech association

FinTech Poland is the largest and most influential fintech association in Poland and the CEE region.

Our role:

- Connect financial institutions, technology companies, startups, regulators, and experts
- Build a strong, innovative, and competitive financial ecosystem

Our mission:

- Support digital transformation
- Promote open finance
- Drive sustainable growth

How we achieve this:

- Thought leadership and knowledge sharing
- International cooperation
- Practical regulatory dialogue

Our impact:

- Build trust and create collaboration opportunities
- Position Poland as a leading hub for modern finance in Europe

Electronic and mobile payments,
Online loans and financing

ERP is a powerful tool that provides instant access to data and enables real-time analysis, helping businesses make quick decisions and adjust plans efficiently.

Key benefits:

- Eliminates production stoppages during implementation
- Reduces human errors in logistics and supply chain management
- Introduces a new quality of people management

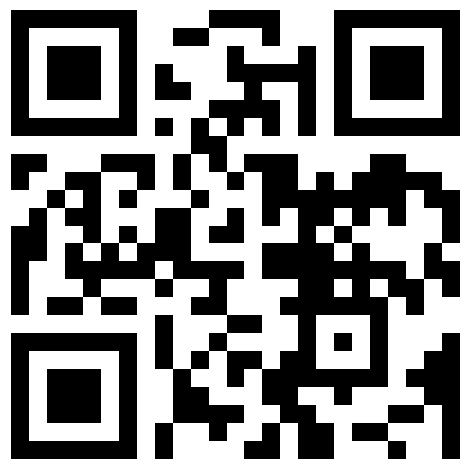

Core advantages:

- Better control over processes
- Optimal use of human resources
- Employee development planning to reduce adaptation costs in changing markets

Next-level innovation:

- Advanced process mining
- Machine learning for predictive insights

ERP sets new heights in productivity, ensuring businesses stay competitive in today's fast-paced digital landscape.

Cybersecurity

Vidoc is an AI-powered security solution that acts as a virtual security engineer inside your development pipeline.

What it does:

- Detects and fixes complex vulnerabilities in both human- and AI-generated code
- Provides real-time automated fixes for faster remediation

How it works:

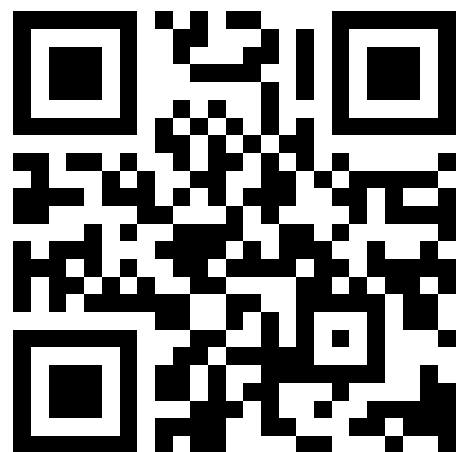

- Uses a customized large language model to:
 - Understand code context
 - Identify zero-day threats
 - Deliver secure patches instantly

Why it's different:

- Unlike legacy tools relying on static rules, Vidoc offers context-aware analysis
- Designed for embedded systems, cloud software, and critical infrastructure

Key advantage:

- Scalable, dual-use protection for next-gen communication technologies
- Addresses the reality that 80% of developers now use AI to generate code, making traditional security insufficient

flyingbisons

Flying Bisons is a strategic design company turning bold ideas into impactful digital products.

What we do:

- Deliver end-to-end execution
- Apply human-centered design for public and private sector leaders

Our team:

- 130+ experts with multidisciplinary skills

Proven track record:

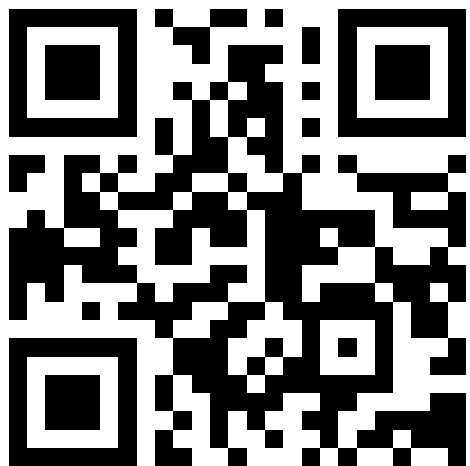

- 300+ digital products delivered
- 200M+ users impacted globally

Global presence:

- Established operations in Riyadh
- Years of experience in the Saudi market
- Combine global expertise with local understanding for high-stakes projects

Why partner with us:

- It's not a cost—it's an investment in measurable results and digital transformation success

SIMPLITO

SOFTWARE R&D

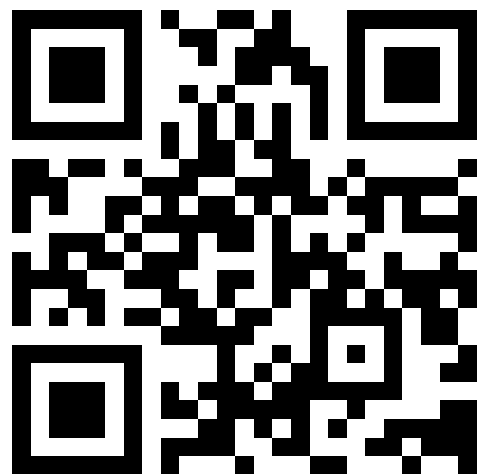

SIMPLITO is a software R&D company with 10+ years of experience in developing low-level technologies that power products built on the highest privacy standards.

Our key solutions:

- PrivMX – a platform for rapid implementation of end-to-end encryption in:
 - Web applications
 - Mobile apps
 - IoT and XR environments
- DeepFellow – a framework enabling IT teams to:
 - Deploy private AI within local infrastructure
 - Build dedicated AI agents

What drives us:

- Commitment to Good Technologies
- Data privacy protection
- Safeguarding intellectual property

Cryptocurrencies and blockchain,
Cybersecurity

ITFS is a Polish consulting company operating in the IT/ICT market since 2012, with headquarters in Gdynia and branches in Warsaw, Denmark, and the US.

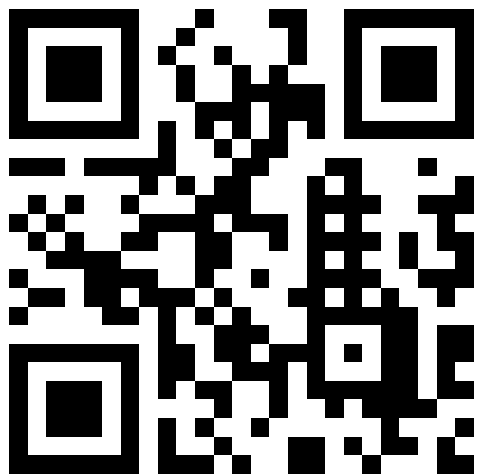

Our expertise:

- Recruitment and structuring of IT teams
- Sourcing skilled specialists to meet specific project requirements quickly and efficiently
- Staff augmentation solutions for long-term projects and ongoing business needs

What we deliver:

- Rapid alignment of experts to client projects
- Building entire competence centres from scratch
- Creating specialised teams tailored to client goals

Our approach ensures flexibility, speed, and high satisfaction, enabling businesses to scale their IT capabilities effectively.

Electronic and mobile payments,
eCommerce

Milio is an eCommerce system by Webchefs, tailored for Thailand, Korea, Singapore, and Hong Kong.

Key capabilities:

- Supports local scripts, payments, currencies, and couriers — no plugins required
- Each market runs its own store instance with:
 - Real-time inventory sync
 - Cross-instance order routing
 - Unified reporting

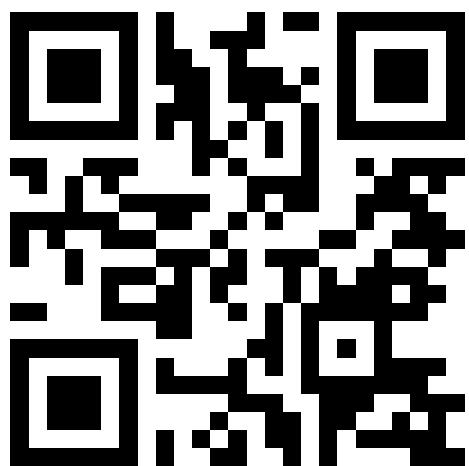

Compliance & efficiency:

- Automated tax and accounting compliance for regional standards
- Lean, stable, and scalable architecture reducing maintenance costs

AI-powered features:

- Automated content creation
- Personalized recommendations
- Dynamic pricing insights
- Sales forecasting

Backed by 10+ years of Webchefs' experience in eCommerce and localization across APAC and Europe.

Cryptocurrencies and blockchain,
automation of cooling systems

We provide teams of automation engineers specialised in cooling systems for server rooms, large data centres, cryptocurrency infrastructure, and more.

Our approach:

- Integrate directly with the client's team as a qualified partner
- Deliver design, implementation, and optimisation of:
 - Control systems
 - Monitoring systems

Key benefits:

- Expertise in automation for mission-critical environments
- Minimised downtime and optimised energy efficiency
- Scalable solutions tailored to client needs

Our mission: ensure reliable, efficient, and secure operations for high-performance IT infrastructure.

Winged IT is a Polish company specializing in Tech Recruitment, Staff Augmentation, Cybersecurity, and Consulting.

We have 120 employees and serve 100+ clients across 4 continents.

What we do:

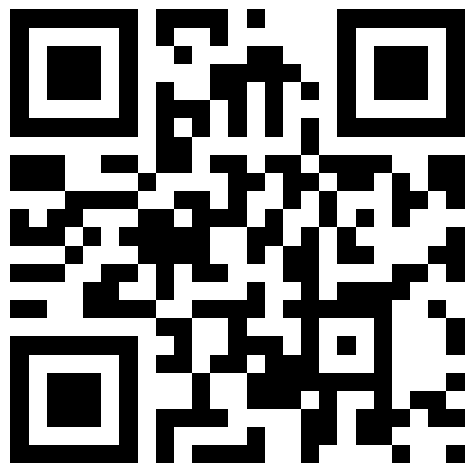

- Deliver top tech talent from Central and Eastern Europe
- Specialists ready to work remotely from Poland or relocate globally

Our services:

- Recruitment and staff augmentation for long-term projects
- Support in building remote tech and cybersecurity teams (in-house or outsourced) in Poland

Why Poland:

- A leading hub for IT expertise, cost efficiency, and global delivery
- Learn more at <https://doITinPoland.com/>

Cybersecurity

Rublon is a cybersecurity company offering an advanced Multi-Factor Authentication (MFA) solution that secures employee access to IT resources and protects against threats like ransomware and authentication attacks.

How it works:

- After password entry, Rublon requires a second factor, such as:
 - Mobile push notification
 - Phishing-resistant security key

Key benefits:

- Helps organizations comply with data protection regulations, cyber insurance requirements, and security standards
- Trusted by hundreds of customers in 50+ countries

Integration:

- Works seamlessly with networks, servers, endpoints, and applications
- Enables centralized authentication management and security policy enforcement

Rublon MFA delivers real-time protection and enterprise-grade security for modern organizations.

Electronic and mobile payments, Online loans and financing, Digital banking, Personal Finance Management (PFM), InsurTech

We are a custom software development company with 12+ years of experience and 110+ projects delivered worldwide.

Our expertise:

- Mobile app development: iOS, Android, Flutter
- Specialized in IoT, streaming, and FinTech

FinTech portfolio includes:

- PayGo – international fund transfers & FX
- Spend management platform – prepaid cards & expense control
- Evidos – digital signing & ID verification (5M+ transactions yearly)

Trusted by:

- Global leaders: Sky UK, Akamai, Unilever, Spar
- Innovative start-ups: Grow Sensor, Vicodo

Global presence:

- Operations across US, Europe, Asia, Middle East, Australia

Our approach:

- Agile delivery + AI expertise
- Secure, scalable, and innovative solutions tailored to regional needs

IT and digital solutions and services

infinity group.

We help companies transform the way they work through smart IT and digital solutions.

Our services include:

- Process automation to streamline workflows
- Enterprise platforms for scalable operations
- Tailored software development aligned with business goals

What we deliver:

- Technology combined with strategic insight
- Innovation that drives efficiency and growth
- Long-term value through digital transformation

Our mission: enable organizations to work smarter, adapt faster, and achieve sustainable success in a dynamic market.

Electronic and mobile payments, Online loans and financing, Digital banking, Cryptocurrencies and blockchain,

rand/lab

Randlab Software is a technology company specializing in innovative IT solutions tailored to business needs.

What we do:

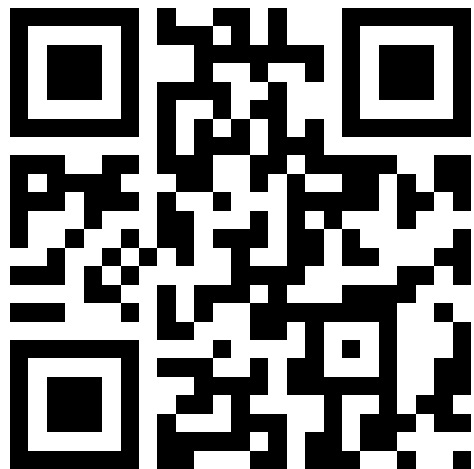

- Develop advanced software to support:
 - Digital transformation
 - Operational efficiency
 - Secure data management

Our expertise:

- Custom applications
- Cloud-based platforms
- System integration
- AI-driven tools

At the fair, we present:

- Latest products and services designed to:
 - Enhance business processes
 - Improve customer experience
 - Ensure scalability for organizations of any size

EFTlab is a Brisbane-based PayTech company delivering advanced payment testing and processing solutions for:

- Banks
- Payment processors
- Large merchants worldwide

Core products:

- EFTsim – a powerful payment simulator
- EFThub – a flexible payment switch

Key capabilities:

- Support for real-time payments
- ISO 20022 compliance
- Seamless integration with modern and legacy systems

Why EFTlab:

- Clients in 15+ countries
- Enables cost reduction and faster time-to-market
- Cloud-native, highly configurable solutions
- Backed by a team of payment experts

Our mission: help financial institutions innovate and scale in a fast-moving digital payments landscape.

SMARTTECH3D has been designing and building optical measurement systems for over 20 years, delivering complete hardware and software solutions tailored to individual customer needs.

What sets us apart:

- Highest quality products meeting the expectations of demanding clients
- Innovation based on the latest scientific and technical achievements
- Continuous development of structured light measurement methods

Our expertise:

- Custom optical systems for precise 3D measurements
- Proven success in domestic and international markets
- 100% Polish capital company

Additional services:

- Creation of digital copies secured with NFTs, combining:
 - Precision
 - Modernity
 - Data security

SMARTTECH3D ensures accuracy, reliability, and innovation for industries worldwide.

Cybersecurity

ProDevice (manufacturer: DISKUS Polska Sp. z o.o.) provides solutions for irreversible and secure data destruction, including:

- Degaussers and deflashers for permanent data erasure
- Shredders for physical destruction of storage media
- Secure storage solutions for data media

Compliance & quality:

- Meets strict international data protection standards
- Certified with ISO9001, ISO27001, ISO14001, AQAP2110

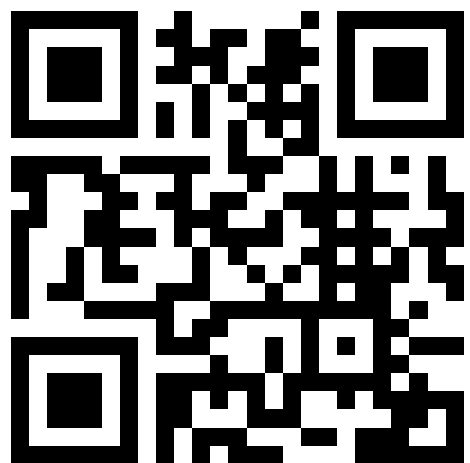

Recognition:

- Member of #CyberMadeInPoland cluster
- Holder of “Cyber Security Made in Europe” quality mark by ECSO

Where we excel:

- Rapid and irreversible data destruction for critical environments

ProDevice ensures data security, compliance, and peace of mind for organizations worldwide.

Digital banking, Personal Finance
Management (PFM), InsurTech, RegTech

FinTech Software Development & Product Engineering

We deliver end-to-end technology solutions for the financial sector, combining innovation, security, and scalability.

Our expertise:

- Custom FinTech software development
- Product engineering for digital banking and payments
- Mobile and web applications for financial services
- API integration and open banking solutions
- AI-driven analytics and automation tools

Digital banking, Cryptocurrencies and blockchain, InsurTech, Cybersecurity

L A W F I R M

Leśniewski Borkiewicz Kostka & Partners (LBK&P)

Law and tax advisory firm based in Warsaw and Wrocław, focused on supporting modern businesses, including the FinTech sector.

Who we are:

- Experienced advisors from leading Polish and international consulting firms
- Recognized experts in NewTech, M&A, and business law

What we do:

- Provide agile, practical legal and tax consulting
- Work as part of clients' teams, focusing on clear communication and results

Our clients:

- Technology and FinTech companies seeking innovative, business-oriented solutions

Integrated services through partners:

- HR
- Accounting and tax compliance
- CFO outsourcing
- Arbitration

Our approach: simple language, practical advice, and integrated solutions for modern business.

Cybersecurity

QED Software - technology partner since 1999, specializing in auditable, enterprise-grade AI/ML systems for market leaders, including the FinTech sector.

What makes us unique:

- Combine rigorous R&D methodology (led by Prof. Dominik Ślęzak) with deep software engineering expertise
- Deliver solutions that are scientifically sound, reliable, and fully compliant

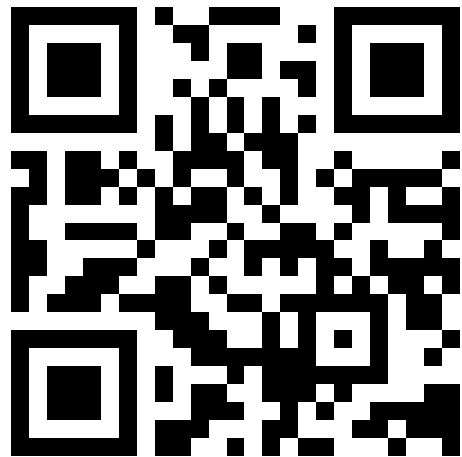

Competitive edge:

- End-to-End approach covering the full AI/ML lifecycle
- Proprietary platforms:
 - QEDEX – agentic analytics
 - BrightBox – MLOps standardization
- Accelerate time-to-market and ensure high-precision predictions

Our services:

- Strategic AI/ML consulting
- Architecture design
- Secure deployment
- IP protection and R&D spin-off support

Our mission: turn advanced AI/ML into practical, auditable, and business-ready solutions.

Cybersecurity, AI, Machine Learning

QEDEX Platform – Global Premiere at Singapore FinTech Festival

Participating in the National Pavilion marks a key milestone for the launch of QEDEX.

About QEDEX:

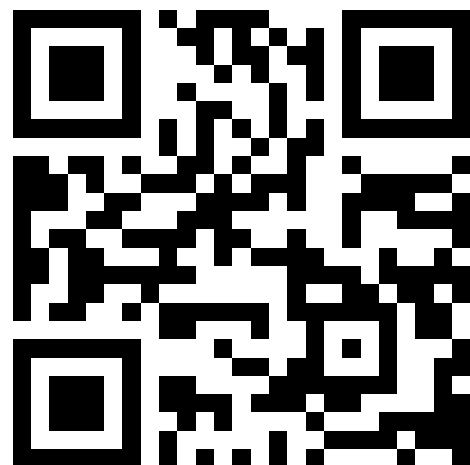

- Premiere launch: December 2026
- Purpose: Enable business users to design, automate, understand, and operationalize complex ML and Data Discovery processes
- Deployment options:
 - SaaS
 - On-premise
 - Hybrid

Key Features:

- Combines Big Data power of ML with LLM-driven user-friendly communication
- Automates complex tasks while maintaining enterprise-grade security
- Delivers actionable results without technical complexity

Why QEDEX matters:

- Reduces barriers to advanced analytics
- Accelerates operationalization of AI/ML in business environments

Digital banking, Market Risk
Management

finQbit – Quantum-Powered Market Risk Modelling

finQbit's platform leverages GPUs and quantum computing to transform market risk modeling for the OTC derivatives market (over \$5T traded daily).

Key Advantages:

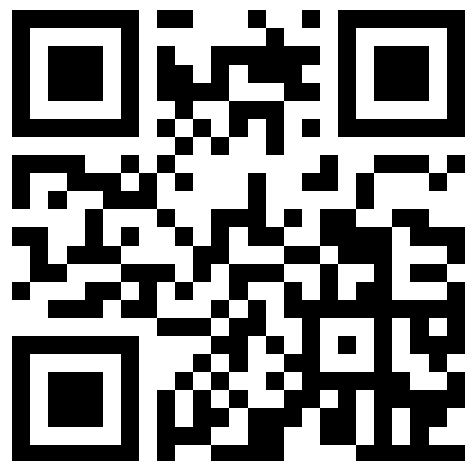

- Enables quantitative analysts to build models without quantum expertise
- Works like classical computing but with quantum acceleration
- 10x faster risk model training compared to competitors

Why it matters:

- Market risk management requires complex simulations that classical computing struggles to handle
- Quantum computing offers a sustainable alternative, reducing the carbon footprint of high-performance computing

Our edge:

- Develop optimal algorithms for risk modeling
- Combine speed, accuracy, and sustainability for next-generation financial technology

Gridaly – All-in-One Event Management Platform

Designed for B2B organizers who want to run professional events without the chaos.

What Gridaly offers:

- End-to-end event management, including:
 - Registration and ticket sales
 - Check-in
 - Attendee engagement
- Built-in website builder for quick event pages
- Web and mobile app for seamless participant experience

Key Benefits:

- Saves time and eliminates routine tasks
- Turns complex logistics into a smooth, automated process
- Lets organizers focus on impact, not spreadsheets
